| Informação complementar : Valor Paramétrico (VP) - valor máximo ou mínimo fixado para cada um dos parâmetros de acordo com o D.L. 69/2023 de 21 de agosto; N.º de Análises Previstas - relativas ao Plano Controlo Qualidade da Água (PCQA); % de Análises Realizadas - relativas ao PCQA aprovado; Vmáx e Vmín - valores máximo e mínimo obtidos nas análises realizadas; % Análises Conformes - que cumprem a legislação.                                                                                                         |                                                                                                   |                                                                                     |        |                            |                     |                               |            |                       |
| Das análises realizadas todas apresentaram resultados conformes, à exceção do pH. Os resultados apresentados demonstram assim a boa qualidade da água distribuída no Concelho de Palmela. O valor de pH é reflexo das características hidrogeológicas da água. A CMP obteve parecer favorável da Autoridade de Saúde para não fazer correção de pH. Assim, valores de pH abaixo dos 6,5 são registados como incumprimento mas não constituem qualquer preocupação do ponto de vista da qualidade da água para abastecimento humano. |                                                                                                   |                                                                                     |        |                            |                     |                               |            |                       |
| Sistema de tratamento: desinfecção com hipoclorito de sódio (produto químico utilizado como desinfetante para garantia da barreira sanitária, impedindo contaminação microbiana).                                                                                                                                                                                                                                                                                                                                                   |                                                                                                   |                                                                                     |        |                            |                     |                               |            |                       |
